

305 8-Way Pump Fed Fogger

MODEL: AF 950118

OVERVIEW

The 305 8-Way Pump-Fed Fogger is a chemical atomizer that receives ready-to-use chemical solution from a central chemical system. Using 59 CFM @ 80 PSI of compressed air, it will atomize the solution and project it as light, "damp" fog particles in 8 directions up to 25 feet.

Key Features

- Atomizes chemical solutions using compressed air
- Projects light, "damp" fog particles at distances up to 25' in 8 opposite directions
- Receives ready-to-use chemical from a central chemical feed system
- Solution needle valve allows refinement of the particle size
- Check valve prevents excessive dripping after shutdown
- Chemically resistant polypropylene construction ensures durability and years of outstanding performance

Includes

- Machined polypropylene ceiling manifold
- Machined polypropylene fogger body
- Chemical needle valve
- Chemical check valve

Options

Electronic Zone Control

| | |
|--|----------|
| 3-Zone PF Fogger PLC Vision Controller | # 950843 |
| 6-Zone PF Fogger PLC Vision Controller | # 950846 |
| Zone Control Kit | # 950850 |
| Metered Bleed Assembly | # 950852 |

Alternate Check Valve (Viton Standard)

| | |
|----------------------------------|------------|
| TL Check Valve, PVC / EPDM, 3/8" | # 491456-E |
|----------------------------------|------------|

APPLICATIONS

- Sanitizing
- Agriculture/Horticulture
- Animal Health
- Dairy
- Food & Beverage
- Hatchery
- Industrial
- Odor Control
- Pharm/Bio
- And Many Other Applications!

REQUIREMENTS

Ready-to-Use Chemical Solution

| | |
|-------------|-------------|
| Temperature | up to 160°F |
| Pressure | 20 - 35 PSI |

Compressed Air

up to 59.0 CFM @ 80 PSI

Minimum Air Supply Line

1"

AFCO
equipment & engineering
